

Dear #PRCY community,

We are proud to present our third milestone for our retention plan.

We crushed the first milestone \$0.12 with force, and the second one \$1.25 was easy and we have grown a lot in attention and more community members have joined the #PRCY family.

We have the feeling we will move to a hyper growth this year in all means related to #PRCY. The retention plan will be adopted to the new reality of a large number of diversified types of investors, based on the eagerness to fulfil our roadmap action points.

To give more investors (small and large) the opportunity to join the retention plan, a plan will be presented with different sizes of holding of #PRCY coins and their reward.

Milestone Number 3:

Price is set at \$5,50 on our most liquid market at that moment (currently TxBit)
