

Dear #PRCY Family,

First we would like to provide our apologies for the delay, the main reason for this is the well deserved holiday for everybody and because of the high pace of development of the PRCY project we cannot always find the time to create it. Time is precious, like PRivaCY does.

You will notice in the figures that not much has changed overall. The main changes can be found in the Marketing wallet. Admin-Bug Bounty wallet and the free market wallet.

The BuyBack program kicked in Q3 and it resulted in a buy back of PRCY coins of about 235,000 PRCY. This number is counted from the early start. Besides the BuyBack program the main investments we have made are attributable to <https://privacydex.io>. and hence the server hosting costs have become a bit higher.

The Cash in the bank has dropped a bit, but managed very well in relation to the BuyBack Program, investments made, marketing costs and the overall negative market sentiment in Q3.

Our cash management is based on a conservative approach to act as contingency collateral and savings for our near future roadmap goals in 2022 , like the top tier exchange listings we will chase after.

Furthermore, we would like to highlight the great development we made concerning integrating PRCY coin more and more, you may find more information on our website at [PRCY Achievements](#). Expansion of PRCY is key.

Our focus in Q4 will mainly be on finding the right Marketing strategy, we have learned that if you don't try you don't know if something works. It is part of our learning curve journey. The 100,000 PRCY airdrop was a great success.....😄

We are eager to find good solutions and we will not rest to find the best strategy which will result in satisfactory results. We are aware if you don't try something you don't know what the outcome will be.

And remember, "If you can't share, you can't multiply"

Team PRCY Coin
